MODULAR SEATING

The Changing Anatomy Of Modular Seating

THE MOST VERSATILE SEATING SYSTEM AVAILABLE!

- **OVERLAPPING BACK PANELS** allow back to *EXTEND!*
- Adjustable seat depth.
- Available in straight or bi-angular backs.
- Height adjustable BAB.
- Medial/lateral contoured back design.
- **Drop-In and Full-Width backs available.**
- Threaded fasteners pressed into every seat and back support panel to simplify changes.
- Panels fabricated from durable vinyl coated high strength aluminum.
- Modification options available.
- Full line of positioning devices available.

Upper panel moves independently of the lower panel. It can be raised or lowered creating a new back height!

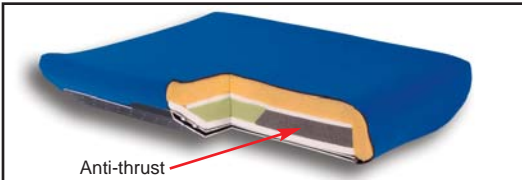

Change the back height, without affecting anything else, by using the overlapping panels and provided extensions to raise or lower the back height as needed.

Seat Cushion Styles

AS4000

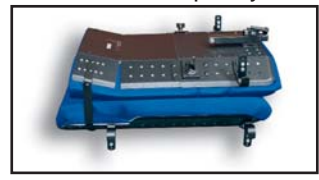

Basic Modular Seat Cushion

- Multiple layering of foams provide density contouring.
- Additional support added under thighs also provides an anti-thrust effect.
- Drop-in seat design.
- High quality open cell & closed cell foams.

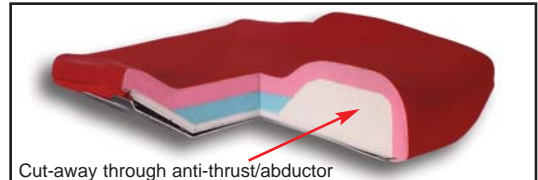

Available in either vinyl or neoprene backed spandex upholstery

Folds Compactly

AS5000

Contoured Modular Seat Cushion

- Shape contoured anti-thrust ledge to maintain client positioning.
- Shape and density contouring to provide excellent weight distribution & lateral support.
- Viscoelastic foams for better contouring to the client.
- Combination of drop-in and full-width seat design.
