

METALCRAFT

CUSTOM PLYWOOD & FOAM SEATING

When "OFF-THE-SHELF" seating
isn't enough for your client.

**METALCRAFT fabricates all of our plywood
& foam seats and backs one at a time.**

*You give us the
dimensions,
modification choices,
and upholstery choices*

then
we do the rest.

CONSTRUCTION

PLYWOOD: We use a high-grade of 1/2" thick solid hardwood 9-ply plywood, cut it to your specifications, and install 1/4-20 T-Nuts for mounting hardware and additional positioning devices.

FOAM: For your custom seating project, we have choices of foam types with various firmness. See the order form custom modification pages.

UPHOLSTERY: The seats and backs are covered in a variety of upholsteries. See our upholstery chart in the inside back cover of the catalog and the order form for a complete listing.
