Posterior Lateral Support Headrest (P.L.S.H.)

Posterior Lateral Occipital Support Headrest (P.L.O.S.H.)

Designed for clients with lateral head tilt due to weak neck musculature.

- Provides lateral support.
- Provides occipital support (P.L.O.S.H. only).
- Lateral support is located above the ears for improved biomechanics.
- Lateral supports can be bent to match the shape of the head.
- Angle adjustable hardware allows optimal alignment with the client.
- Threaded fasteners in the lateral supports for a forehead strap.
- Available with slideaway or swingaway mounting hardware.

(See back side of this brochure)

- Covered in neoprene backed spandex or Suave.
- Available in three sizes.

Optional Chin Roll

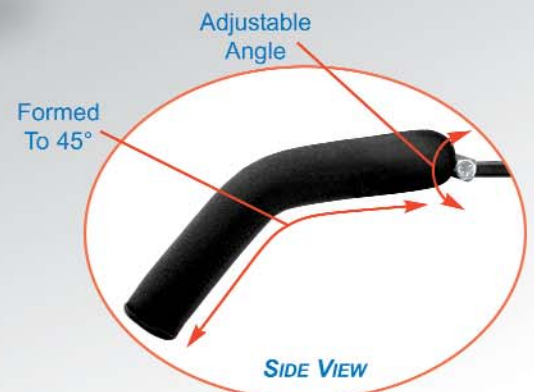

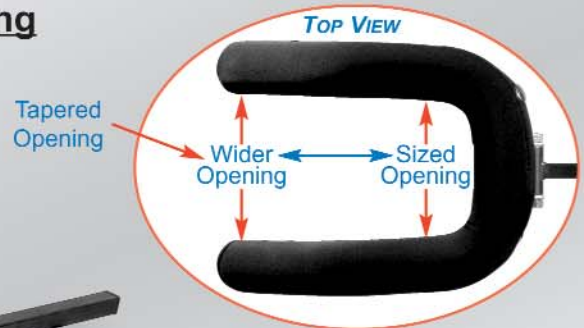

Rigid Anterior Trunk Support (R.A.T.S.)/Occipital Ring

Designed for clients who actively pull forward with their trunk.

- Angle adjustable hardware allows optimal alignment with client.
- Tapered opening for easier application.
- Available with slideaway or swingaway mounting hardware.
- Can be combined with other head positioning pads by using an Add-On Kit.

(See back side of this brochure)

- Covered in spandex.
- Available in four sizes.

Angle & "T" Bars
also available

Adjustable Winged Headrest

- Wings can be rotated inward to provide lateral support to the head.
- Wings can be locked in place to prevent rotation.
- Wings are bendable from 0° to 90°.
- One piece design.
- Accessory mounting points at the ends of each wing.
- Covered in neoprene backed spandex or Suave.
- Available in three sizes.

WING
LOCKING
SCREWS

Loosen lock screws 1/4 to 1/2 turn,
bend wing, retighten both screws.

Suave Upholstery

New Proprietary Upholstery

- Completely smooth contact surface.
- Water repellent surface is easily wipeable.
- Water proof & machine washable upholstery.
- Available on all head positioning products.

Spandex/Neoprene Upholstery

Standard Upholstery

- Spandex contact surface.
- Wipeable and machine washable.
- Water proof upholstery.
- Available on all head positioning products.
